

Cloud Infrastructure Cost Estimation Report

Saifeddine Douidy / ToumAI

July 31, 2025

Total Monthly Cost Estimate

Cost Type	Amount (USD)
Baseline Resources	\$254
Usage-Based Resources	\$57
Estimated Total	\$310 / month

Key Cost Contributors

1. ECS Services (All Microservices)

Component	vCPU	Memory	Monthly Cost
Keycloak	2	4 GB	\$72.08
agenticx	0.25	0.5 GB	\$9.01
analyticx	0.25	0.5 GB	\$9.01
consul	0.25	0.5 GB	\$9.01
nextjs	0.25	0.5 GB	\$9.01
spring-gateway	0.25	0.5 GB	\$9.01
user-management	0.25	0.5 GB	\$9.01
Total ECS Services			\$126.14

2. RDS Databases

Component	Type	Monthly Cost
Keycloak DB	Multi-AZ (t4g.micro)	\$30.81
Main RDS DB	Single-AZ (t4g.micro)	\$16.83
Total RDS		\$47.64

3. Networking

Component	Monthly Cost
NAT Gateway	\$32.85
Application Load Balancers (x2)	\$33.66
Route53 (zones + records)	\$2.00

4. Monitoring & Logging (CloudWatch)

Log ingestion, archival, and query estimates across all services. **Estimated Total: \$37**

Summary

- **Total Services Deployed:** 121 cloud resources
- **Resources Estimated:** 35 (others free or unsupported)
- **Infracost Version:** v0.10.41

For more details, refer to the usage breakdown with: `infracost breakdown --path develop.tfplan --usage-file infracost-usage.yml`

This report was automatically generated to help estimate monthly AWS costs prior to deployment.
